Fireplaces

1 Spark Modern Fires Vent Free Vu Thru Fireplace

The Vent Free Vu Thru from Spark Modern Fires is a 36-inch-wide vent-free gas fireplace that is open on two sides. It allows designers to install a see-through fireplace in a location without a chimney or vent to the outside. The fireplace also includes an electronic ignition and media tray, which allows media such as rocks and glass to be placed around the flame.

2 Eldorado Stone Soho Boutique Fireplace

The Soho Boutique is the latest addition to Eldorado Stone's Eldorado Fireplace Surrounds collection. It is available in three colors: Oyster Shell, Oak Barrel, and Summer Wheat. The colors are available in three finishes: Honed, a smooth finish; Travertine, a rustic surface; and Antique Castello, a European-inspired finish. Fireplaces in this collection come with an installation kit, featuring mounting brackets and matching trim kit.

3 Lennox Hearth Products Montebello DLX Direct-Vent Gas Fireplace

The new Montebello DLX Direct-Vent gas fireplace from Lennox Hearth Products features tall flames and a split oak log to offer the look of a traditional wood fire, while black porcelain and glass media showcase the fire in a contemporary setting. Accessory options include a variety of interior panel styles, screens, andirons, and glass media colors.

4 Napoleon EFC32 and EFL48 Electric Fireplaces

Napoleon electric fireplaces feature contemporary designs with the convenience of a 120V outlet plug-in setup. The EFC32 has a curved bay front, while the EFL48 has a 48-inch linear glass front. Both models feature thin depths with minimal protrusions from the wall and contemporary artwork designs with white stone ember beds that can be customized to optional glass embers in a variety of colors.

5 Hearth & Home Technologies Twilight Modern Indoor/Outdoor Fireplace

The Twilight Modern is a new indoor/outdoor gas fireplace from Hearth & Home Technologies. The two-sided fireplace combines contemporary design with outdoor living. The design offers homebuyers two fireplaces with one standard installation. The fireplace uses Direct Vent technology and delivers 38,000 BTUs, with no additional flue or venting required.
