Now SPARK takes its classic Fire Ribbon outdoors.

Nothing gathers a crowd like fire. And when the night air turns chilly, there is no place you’d rather be.

And our NEW Vu Thru unit offers dual façades that blend seamlessly into any outdoor environment for the ultimate flexibility.

### WHY: SPARK FIRE RIBBON OUTDOOR?

- Accepted by all major building and mechanical codes in the U.S. including the IBC (International Building Code) and the UMC (Uniform Mechanical Code). Please check with local codes before ordering.
- Fast and easy to start with remote control.
- No hassle and mess of building a wood fire or cleanup afterwards.
- More environmentally friendly than burning wood because no fine particulates are released into the air.
- No venting required.
- Available in one and two sided units.

SPARK Modern Fires wants to help you achieve your fireplace vision. We will review your planned installation of this unit. Please provide plan view and section drawings electronically, along with a rendering of the finishing details, and we will help you plan it properly.

This unit should not be installed in areas susceptible to saltwater corrosion or high winds. This product is not warranted against either condition.
